## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Inui et al. 5,889,095.
3. Inui et al. disclose polypropylene and applicants' phosphite stabilizer in Example 14. A film without structure is a composition. Applicants' claims are not novel.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1714

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-3, 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Inui et al. 5,889,095, in view of Crass et al. 4,692,837, Wilhelm et al. 5,085,96, Bothe et al. 4,975,315 or Chatterjee 5,922,471.

Inui et al. has been discussed already. Crass et al. teach polypropylene film in claims 1-3, a phosphite in claim 4, metal in claim 22. Wilhelm et al. cite polypropylene film in claim 1 phosphites in column 3, lines 19-23 and metallized film in column 3, lines 57-65. Bothe et al. reveal polypropylene film in claims 1 and 17-18, aluminum layer in claim 12 and phosphites in column 4, line 11. Chatterjee divulges a metallized film comprising a polypropylene composition in claim 6 and phosphite processing stabilizers in column 3, lines 5-17. It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to use the phosphite stabilizer of Inui et al., in the polypropylene films of the secondary references, since the preferred stabilizer system for metallizable polypropylene films is a blend of phenolic and phosphite antioxidants.

#### ***Election/Restrictions***

7. The restriction imposed 6/2/03 is withdrawn by the examiner.
